

## **ALERT SYSTEM SIGN-UP**

On February 28, 2019 at the Iron Gate Town Council meeting, it was voted on and approved to have an Alert System for the residents of the Town of Iron Gate. This system is much like the alert systems that the Alleghany County School System and the Alleghany County Emergency Services has to alert the public in certain circumstances. The Alert System will notify residents that the Town of Iron Gate services only, to emergency situations, such as boil water advisories or water or sewer interruption and can even give notices to special events in the Town of Iron Gate.

To sign up for this service, we would need our residents to contact Town Hall (862-0770) and give us their permission to use either a home phone number, a cell phone number (for text messages) and/or an email address for their notification. The deadline to have this information into Town Hall is April 30, 2018. Residents who we service may also leave this information in the drop box in front of Town Hall, which is secure. We are strongly encouraging our residents that we service to take part in this.
